

How To Install Tool Presets (TPL files)

Method A - Drag and Drop - Quickly Install multiple toolsets at once

1. Select the GrutBrushes .TPL files in Windows Explorer (PC) or Finder (MAC)
Drag and drop them into Photoshop.

TIP: Select ONLY .tpl files

2. You will now find the Brushes in the Tool Presets Panel (*Window > Tool Presets*)

TIP: If you don't see them, uncheck the 'current tool only box' or select the brush tool

Method B - From the Tool Presets Panel - One TPL at a time

From the Tool Presets panel (*Window > Tool Presets*)
Click on the top right drop-down menu and select 'Load Tool Presets' (or choose to open the 'Preset Manager' to organise your tool presets)

Method C - Use the GrutBrushes Plugin - (Photoshop CC only)

Available at GrutBrushes.com/plugin

Members click 'new' to install new brushes directly into Photoshop from the web!

Install the GrutBrushes Panel (GrutBrushes.com/plugin) Open the panel (*Window > Extension > GrutBrushes*)
Click the 'Add' button, or right click and choose 'Add Brushes' from the panel menu. Select the GrutBrushes TPL files you want to install and click 'ok'. All your new GrutBrushes will now appear in the GrutBrushes panel.
Happy painting!
