

## How to manually un-Install the GrutBrushes plugin

### Windows:

1. Make sure Photoshop is closed first.
2. Delete the two GrutBrushes folders  
'**com.GrutBrushes.SelectorPanel**' and '**com.GrutBrushes.WebPanel**'  
in your User \AppData\Roaming\Adobe\CEP\extensions folder.

*EXAMPLE:* If your login name is **JaneDoe** and your windows was installed on the C: drive the path location for those GrutBrushes plugin folders would be here:

**C:\Users\JaneDoe\AppData\Roaming\Adobe\CEP\extensions\**

This PC > Local Disk (C:) > Users > Nicolai > AppData > Roaming > Adobe > CEP > extensions				
Name	Type	Date modified	Size	
com.GrutBrushes.SelectorPanel	File folder	2015-09-10 1:15 PM		
com.GrutBrushes.WebPanel	File folder	2015-08-17 3:20 PM		
com.madebysource.othericons	File folder	2015-02-17 2:33 PM		

**That's it, you're done!** When you reload Photoshop should be no sign of GrutBrushes in your Window > Extensions menu .

### Mac:

1. Make sure Photoshop is closed first.
2. Delete the '**com.GrutBrushes.SelectorPanel**' and '**com.GrutBrushes.WebPanel**' folders in your User folder:

"~/Library/Application Support/Adobe/CEP/extensions/"

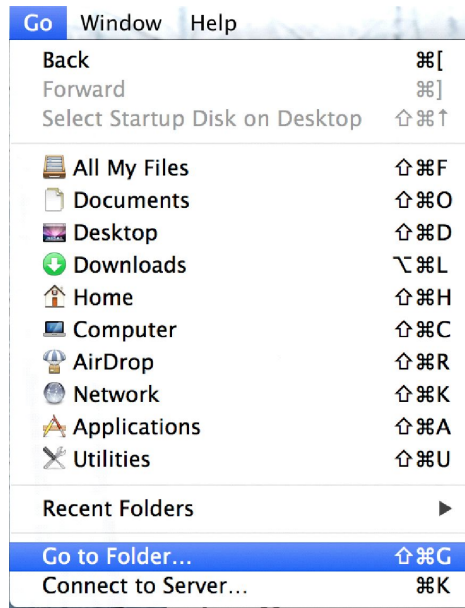

*EXAMPLE:* If your login name is **JaneDoe** the path location for the folders would be here:

/Users/**JaneDoe**/Library/Application Support/Adobe/CEP/extensions/

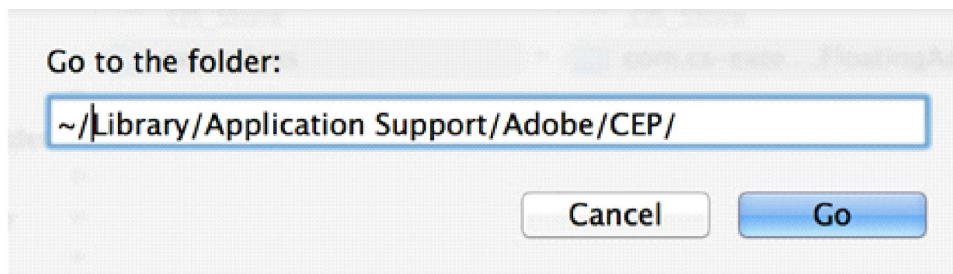

**Once you've deleted the two GrutBrushes folders you're done!** when you reload Photoshop should be no sign of GrutBrushes in your Window > Extensions menu .

### Don't see a /Library directory?

OSX by default hides the library Folder. It's there, you just can't see it. Here's a good way to get to it. In Finder, go to the Top Menu bar and select Go > GoToFolder

In the pop up window type in the shortcut path to your CEP folder:  
**~/Library/Application Support/Adobe/CEP**

This will open a window view into this CEP folder.  
Inside this CEP folder, there should be able to find the “extensions” folder that contains the two GrutBrushes folders mentioned above.

If you are still having trouble finding your User Library folder, this document from Adobe may help:

<https://helpx.adobe.com/x-productkb/global/access-hidden-user-library-files.html>

## Deleting the Brushes

### Windows:

The actual GrutBrushes (TPL files and PNG files) are stored in the following folder

*[user directory]\AppData\Roaming\Adobe\GrutBrushes\brushes*

For example, on my computer that folder is found here:

*C:\Users\Nicolai\AppData\Roaming\Adobe\GrutBrushes*

Deleting that folder will delete all GrutBrushes you installed using the GrutBrushes plugin.

### Mac:

The actual GrutBrushes (TPL files and PNG files) are stored in the following folder

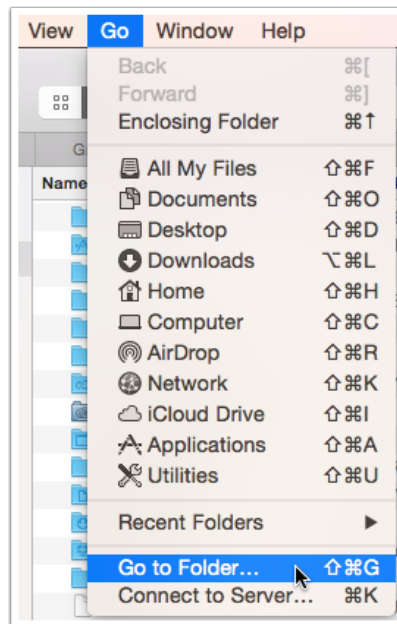

*[user directory]/Library/Application Support/Adobe/GrutBrushes/brushes*

For example, If your username is **JDoe** the brushes are found here:

*/Users/JDoe/Library/Application Support/Adobe/GrutBrushes/brushes*

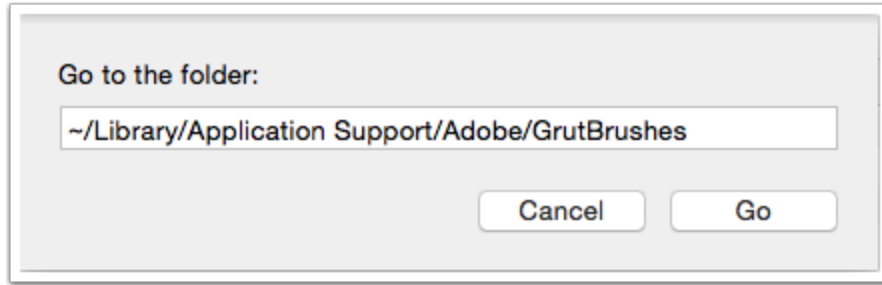

### Don't see a /Library directory?

OSX by default hides the library Folder. It's there, you just can't see it. Here's a good way to get to it. In Finder, go to the Top Menu bar and select Go > Go To Folder

In the pop up window type in this shortcut path to your brushes folder:

**~/Library/Application Support/Adobe/GrutBrushes/brushes**
